Please find below and/or attached an Office communication concerning this application or proceeding.

Sequence Rules

This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason(s) set forth below or on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures. The specification provides a number of sequences, on pages 17-40 that are not identified by proper sequence identifier.

Applicant is given ONE MONTH, or THIRTY DAYS, whichever is longer, from the mailing date of this letter within which to comply with the sequence rules, 37 CFR 1.821 - 1.825. Failure to comply with these requirements will result in ABANDONMENT of the application under 37 CFR 1.821(g). Extensions of time may be obtained by filing a petition accompanied by the extension fee under the provisions of 37 CFR 1.136(a). In no case may an applicant extend the period for reply beyond the SIX MONTH statutory period. Direct the reply to the undersigned. Applicant is requested to return a copy of the attached Notice to Comply with the reply.

Miscellaneous Note

As a separate matter, applicant is requested to review the newly filed claims, as the claims refer to STR markers AAG1 and AAG5, but the specification does not disclose markers identified by these names. (The specification refers to markers named AAAG1 and AAAG5, see Table 2, page 8). Clarification of this matter prior to the commencement of prosecution would be appreciated.
